

Planning - B13 -

This module allows for labor to be planned with precision (week, day, two or three teams). It is able to accurately indicate the production capacity for each entity (i.e., work hours ending earlier on Friday, statutory holidays, etc.).

In the calendar thus defined, the lots, order line files, etc. can be placed at will, and time totals are displayed in real time upon entering the data.

You may also display the totals per frame type, glazing quantity, frame quantity, etc.

A color display also indicates the degree to which some entries have a heavier load than others. (See below.)

Note that the total is not limited to the "calendar" display and is also available for "classic" lots.

Future extensions are planned to:

- Correlate the Planning Module with the existing "Production Tracking" Module
- Correlate the Planning Module with the existing Stock Management Module.
