

File Transfer - B4 -

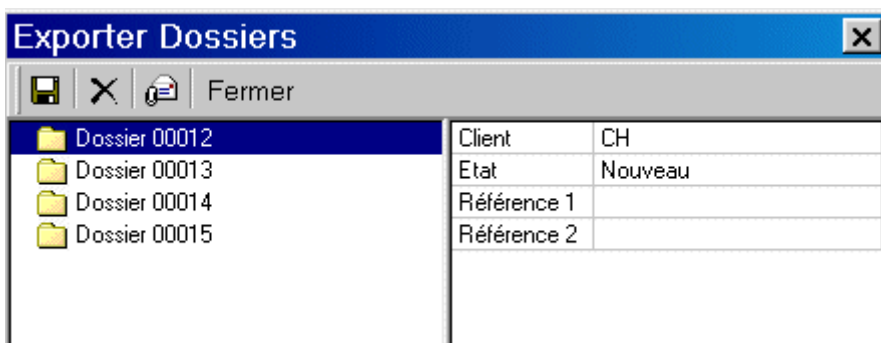

This module allows for the transfer of files between various sites or from sales representatives to headquarters.

The objective is obviously to avoid re-entering a file! This prevents errors and wasted time.

Each site (and/or reseller) is identified by a number in order to avoid any issue with identical files numbers over different sites.

Numéro de site.....	10
Nom du site.....	Bxl
Description du site.....	Bruxelles

On the exporting site, simply select the files you wish to export.

CHACALXXI then creates a file you will transfer as you like, in particular by e-mail.

On the reception site, simply copy the file and launch the importing function (partial selection also possible).
